Call for Technical Papers

ICSE is the premier forum for presenting and discussing the most recent and significant technical research contributions in the field of Software Engineering. We invite high quality submissions of technical research papers describing original and unpublished results of software engineering research. We welcome submissions addressing topics across the full spectrum of Software Engineering.

If a submission is accepted, at least one author of the paper is required to attend the conference and present the paper in person. In addition, authors of accepted papers will be invited to submit artifacts related to the paper; these will be evaluated by the Artifact Evaluation Committee.

Evaluation Criteria

Each paper submitted to the Technical Track will be evaluated based on the following criteria:

- **Soundness**: How well the paper's contributions are supported by rigorous application of appropriate research methods.
- **Significance**: The extent to which the paper's contributions are novel, original, and important, with respect to the existing body of knowledge.
- **Verifiability**: Whether the paper includes sufficient information to support independent verification or replication of the paper's claimed contributions.
- **Presentation**: Whether the paper's quality of writing meets the high standards of ICSE, including clear descriptions and explanations, adequate use of the English language, absence of major ambiguity, clearly readable figures and tables, and adherence to the formatting guidelines provided below.

Submission Instructions

A Technical Track submission must not exceed 10 pages, including all text, figures, tables, and appendices; two additional pages containing only references are permitted. It must conform to the IEEE Conference Proceedings Formatting Guidelines. The submission must also comply with the ACM plagiarism policy and procedures. In particular, it must not have been previously published elsewhere and must not be under review elsewhere while under review for ICSE. The submission must also comply with the IEEE Policy on Authorship. For more instruction about submission, please visit the conference website.

Lastly, the ICSE 2019 Technical Track will employ a double-blind review process. Thus, no submission may reveal its authors’ identities. The authors must make every effort to follow the double-blind review process. In particular, the authors’ names must be omitted from the submission and references to their prior work should be in the third person. Further advice, guidance and explanation about the double-blind review process can be found on the conference website. Submissions to the Technical Track that meet the above requirements can be made via the submission site (https://easychair.org/conferences/?conf=icse2019).
