41st International Conference on Software Engineering
 May 25–31, 2019 | Montréal, QC, Canada

Software Engineering Education and Training (SEET)

Co-Chairs

- Daniela Damian, University of Victoria
- Sarah Beecham, Lero – the Irish Software Research Centre

Program Committee

- Nour Ali, Brunel University
- Paris Avgeriou, University of Groningen
- William Billingsley, University of New England
- Valeria Borsotti, IT University of Copenhagen
- Ivana Bosnic, University of Zagreb
- Jim Buckley, University of Limerick
- Jeffrey Carver, University of Alabama
- Igor Cavrak, FER
- Tony Clear, Auckland University of Technology
- Alison Clear, EIT
- Steve Counsell, Brunel University
- Maya Daneva, University of Twente
- Elisabetta Di Nitto, Politecnico di Milano
- Hakan Erdogmus, Carnegie Mellon University
- Robert Feldt, Blekinge Institute of Technology
- David Garlan, Carnegie Mellon University
- James Herbsleb, Carnegie Mellon University
- Letizia Jaccheri, Norwegian University of Science and Technology
- Klaas-Jan, Stol, University College Cork and Lero – the Irish Software Research Centre
- Eric Knauss, Chalmers | University of Gothenburg
- Marco Kuhrmann, Clausthal University of Technology
- Anna-Lena Lamprecht, Utrecht University
- Timothy Lethbridge, University of Ottawa
- Stephen MacDonell, University of Otago
- Tomi Männistö, University of Helsinki
- Sabrina Marczak, PUCRS
- Tiziana Margaria, University of Limerick and Lero – the Irish Software Research Centre
- Roger McDermott, Robert Gordon University
- Amila Mjeda, Lero – the Irish Software Research Centre
- John Noll, University of East London and Lero – the Irish Software Research Centre
- Rory O'Connor, Dublin City University and Lero Irish Software Research Centre
- Michael Oudshoorn, Northwest Missouri State University
- Maria Paasivaara, Helsinki University of Technology
- Cecile Peraire, Carnegie Mellon University Silicon Valley
- Marian Petre, The Open University
- Austen Rainer, University of Canterbury
- Ita Richardson, Lero, University of Limerick, Ireland
- Martin Robillard, McGill University
- Walt Scacchi, University of California, Irvine
- Cristina Seceleanu, Mälardalen University
- Outi Sievi-Korte, Tampere University of Technology
- Paolo Tell, IT University of Copenhagen
- Sira Vegas, Universidad Politécnica de Madrid
- Aurora Vizcaino, Universidad de Castilla - La Mancha
- Claudia Werner, UFRJ

Important Dates

Submission date	Oct. 1, 2018
Notification of Acceptance	Dec. 17, 2018
Camera Ready Copy	Feb. 9, 2019

“Multidisciplinary Approaches for Software Engineering Education and Training in the Digital Era”

Call for Papers

The Software Engineering and Training (SEET) Track provides a unique forum for researchers, educators and practitioners to meet to discuss challenges, innovations, and best practices in software engineering education and training.

Aims and Scope

The demands on the educator are becoming increasingly complex: there must be a balance between offering a range of teaching approaches and retaining quality in teaching. The overall question SEET 2019 attempts to address is “What teaching methods maintain quality, encourage students to look beyond programming concepts, are sustainable, and offer students and practitioners a rewarding experience?” Satisfying student and society demands creates the need for a multidisciplinary learning environment that might include project management, organizational behavior, law, ethics, cultural awareness, and socio-psychology of computer-mediated communication. Submissions are welcome on a variety of topics, but those that address the multidisciplinary nature of software engineering education and training in the digital era are particularly welcome. (Full details are given on SEET web page – URL below).

Submission Guidelines

Full Papers (8-10 pages) documenting results and findings, where the research presented has followed established research methods. (2 extra pages are allowed for references only).

Short papers (max 4 pages) reporting novel approaches that may not as yet have been fully evaluated, which will be presented as posters.

Case study papers (max 10 pages) reporting on innovative approaches, courses, tools, or delivery formats.

Panel session proposal (max 4 pages) which describe the topic to be discussed, explain why this topic will be of interest and give details of the proposed panel membership.

Evaluation

All submissions will be reviewed by members of the SEET Program Committee. All papers and panel proposals must not have been previously published or concurrently submitted elsewhere. Submissions will be evaluated on the basis of relevance to SEET goals, significance of contribution, and quality of presentation.

Accepted Submissions

Accepted papers and panel summaries will be published in the ICSE-SEET 2019 Proceedings and in the ACM and IEEE digital libraries.
